

A'INGAE METRICAL PHONOLOGY AND ITS INTERFACES

I analyze stress assignment in A'ingae (or Cofán, ISO 639-3: con), an Amazonian isolate spoken by ca. 1,500 Cofán people in northeast Ecuador and southern Colombia. I argue that A'ingae glottalization is a facultative feature of the metrical foot. I provide a detailed description of the language's rich inflectional paradigm. I demonstrate that the distribution of stress and glottalization depends on complex facts of morphosyntax.

DOMINANCE IS NON-REPRESENTATIONAL. EVIDENCE FROM A'INGAE VERBAL STRESS. *Phonology*. Revise & resubmit.

RATIONALE AND APPREHENSIONAL SEMANTICS: A'INGAE IN A TYPOLOGICAL PERSPECTIVE

I analyze the semantics of A'ingae rationale clauses and apprehensional adjuncts in collaboration with Scott AnderBois. We describe different uses of the A'ingae apprehensional morpheme -sa'ne 'APPR' and put forth a formal proposal which elucidates language-internal asymmetries and typological trends within the domains of rationale and precautioning clauses.

RATIONALE AND PRECAUTIONING CLAUSES. INSIGHTS FROM A'INGAE, as first author, with Scott AnderBois. Submitted.

THE APPREHENSIONAL DOMAIN IN A'INGAE (COFÁN), as first author, with Scott AnderBois. In an untitled volume on apprehensive and precautioning markers. A'INGAE LANGUAGE DOCUMENTATION

I carried out language documentation in the A'ingae-speaking communities of Dureno and Sinangoé, Sucumbíos, Ecuador. I deposited over 14 hours of traditional and contemporary oral narratives. I contributed to the development of LingView, a web interface for viewing multimedia language materials.

THE LEFT PERIPHERY OF A'INGAE

I argue that A'ingae second-position clitics are matrix clausal C-heads. Thus, I show that—despite its apparent non-configurationality—A'ingae has structured left periphery.

COMPLEX LEFT PERIPHERY IN A'INGAE. Poster presented at the 25th Workshop on Structure and Constituency in Languages of the Americas, Sogang University, Seoul. 2021. [handout](#) [abstract](#)

PIED-PIPING BY CYCLIC AGREE

I argue that pied-piping is a consequence of WH-feature percolation, formalized within Béjar and Rezac's (2009) model of Cyclic Agree. I capture cross-linguistic variation with respect to pied-piping and WH-inversion. I account for clausal pied-piping in Basque (isolate, ISO 639-3: eus).

PARAGUAYAN GUARANÍ AND FREE AFFIX ORDER

I describe and analyze the prosodic structure of the verb in Paraguayan Guaraní (or PG, Tupian, ISO 639-3: gug). I show that PG's (partially free) suffix order is determined by phonological subcategorization and prosodic well-formedness. I propose that the phenomenon of free affix order is not unified, but driven by either phonology or morphology, giving rise to two distinct typological profiles.

LOGIC IN SPONTANEOUS LANGUAGE COMPREHENSION

In a collaborative project with Roman Feiman, I designed and implemented a novel experimental paradigm for detecting processing difficulty signatures in self-paced reading tasks. We demonstrate that spontaneous natural language comprehension is normatively accurate.

YUCATEC MAYA SYNTAX IN SIGN-BASED CONSTRUCTION GRAMMAR

I formalize a syntactic fragment of Yucatec Maya (Mayan, ISO 639-3: yua) in Sign-Based Construction Grammar and argue against a nominalization analysis of the language's intransitive subjunctive control.

YUCATECAN CONTROL AND LEXICAL CATEGORIES IN SBCG. In: *Proceedings of the 24th International Conference on Head-Driven Phrase Structure Grammar*. Ed. by Stefan Müller. CSLI Publications, pp. 162–178. 2017. [proceedings](#) [slides](#) [abstract](#)

DEFINITENESS AND WORD ORDER IN POLISH

I argue that ten 'DEF' in Polish (Slavic, ISO 639-3: pol) is a definite determiner whose anaphoric uses are governed by word order and disambiguation. I demonstrate that the determiner ten 'DEF' has a typologically novel range of functions.

DEFINITENESS AND WORD ORDER IN POLISH. Manuscript. Providence, RI: Brown University. 2018. [manuscript](#)

MISCELLANEOUS

I dabble in things other than linguistics (apparently, philosophy and translation).
