

MAKSYMILIAN DĄBKOWSKI / RESEARCH

🌐 maksymilian-dabkowski.github.io

✉ dabkowski@berkeley.edu

I am a PhD student in the Linguistics Department at the University of California, Berkeley.

My research centers on phonology (primarily metrical), morphology, syntax, and the interfaces of the three. My other interests include semantics, language documentation, and psycholinguistics.

The primary empirical focus of my work is A'ingae (or Cofán, iso 639-3: con), an Amazonian language isolate spoken by ca. 1,500 Cofán people in northeast Ecuador and southern Colombia.

Below, my research projects are listed in vague order of recent, active interest. See [curriculum vitae](#) for publications by type and in chronological order.

1	A'INGAE (OR COFÁN)	2
1.1	Metrical phonology and its interfaces	2
1.1.1	... with verbal morphosyntax	2
1.1.2	... with reduplication	2
1.2	Diphthongs and their changes	3
1.3	Apprehensional semantics in a typological perspective	3
1.4	Language documentation	3
1.5	The left periphery	4
1.6	Other	4

6	MISCELLANEOUS	5

1 A'INGAE (OR COFÁN)

1.1 Metrical phonology and its interfaces

1.1.1 ... with verbal morphosyntax

I describe and analyze the phonology of stress and glottalization in A'ingae (or Cofán, isolate, iso 639-3: con) and provide a detailed description of the language's rich verbal morphology. I argue that the A'ingae morpheme-specific dominance effects (stress deletion) cannot be captured representationally. I demonstrate that the licensing of the A'ingae glottal stop differs across two morphophonological domains (metrically licensed within the inner, but not the outer, domain) and interacts with stress deletion, bearing out a new prediction of Cophonologies by Phase (Sande, Jenks, and Inkelas, 2020).

TWO GRAMMARS OF A'INGAE GLOTTALIZATION: A CASE FOR COPHONOLOGIES BY PHASE. *Natural Language & Linguistic Theory*. Resubmitted. HEAVY FEET AND GLOTTAL STOPS IN A'INGAE. Paper presented at the 9th Conference on Indigenous Languages of Latin America, University of Texas at Austin. 2019. [slides](#) [abstract](#)

1.1.2 ... with reduplication

I describe and analyze the A'ingae superplural reduplicative suffix $-ʔσ$, which requires that the base and the reduplicant form $(\sigma_1 \check{\sigma}_2 \check{?}) \sigma_2$. I model this with a reduplicant-specific *cophonology* (e.g. Orgun, 1996), which consists of a ranking of constraints motivated elsewhere in the language's grammar (Dąbkowski, 2022). Thus, I demonstrate that A'ingae reduplication is highly phonologically optimizing.

A'INGAE REDUPLICATION IS PHONOLOGICALLY OPTIMIZING. In: *Supplemental Proceedings of the 2022 Annual Meeting on Phonology*. Washington, DC: Linguistic Society of America. In preparation. [proceedings](#) [talk](#) [poster](#) [abstract](#)

1.2 *Diphthongs and their changes*

I document a typologically unusual process of postlabial raising in A'ingae. I present a model which derives the postlabial raising through an interaction of constraint weights and the number of Q-Theoretic (Inkelas and Shih, 2016, 2017) subsegments, contributing a novel argument for the representations of Q-Theory. I argue that the contemporary variation in the distribution of *ai* and *ii* is a consequence of sound change, followed by recent replacement and partial paradigmatic leveling.

A DIACHRONIC LOOK AT THE A'INGAE HIGH FRONTING DIPHTHONG. Paper presented at the *Borderlands, Minorities, Migrations* conference, Institute of Slavic Studies, Polish Academy of Sciences, Warsaw. 2022. [handout](#) [abstract](#)

1.3 *Apprehensional semantics in a typological perspective*

In a collaborative project with Scott AnderBois, we describe and analyze different uses of the A'ingae apprehensional morpheme *-sa'ne* APPR. We put forth a formal account of rationale and precautioning clauses, which captures language-internal asymmetries and typological trends within this semantic domain.

THE SEMANTICS AND EXPRESSION OF APPREHENSIONAL MODALITY, as second author, with Scott AnderBois. Manuscript. Providence, RI: Brown University and University of California, Berkeley. In preparation.

RATIONALE AND PRECAUTIONING CLAUSES: INSIGHTS FROM A'INGAE, as first author, with Scott AnderBois. *Journal of Semantics*. To appear. [article](#) [manuscript](#)

Ed. by Marine Vuillermet, Martina Faller, and Eva Schultze Berndt. Studies in Diversity Linguistics. Language Science Press. To appear. [chapter](#) [abstract](#)

1.4 *Language documentation*

I documented A'ingae in the indigenous communities of Dureno and Sinangoé, Sucumbíos, Ecuador as well as remotely. I deposited over 14h of traditional and contemporary oral narrative video recordings (of which 2h30 have been transcribed and translated) and elicitation data, including fieldnotes and over 70h of audio recordings. I managed the development of LingView, a web interface for viewing multimedia language materials.

A'INGAE LANGUAGE DOCUMENTATION, as equal author, with Justin Bai, Kalinda Pride, and Nicholas Tomlin. Poster presented at Summer Research Symposium, Brown University, Providence, RI. 2017. [poster](#)

1.5 *The left periphery*

I argue that A'ingae second-position clitics are matrix clausal C-heads. Thus, I show that—despite its apparent non-configurationality—A'ingae has a structured left periphery. I describe A'ingae pied-piping structures and provide a Q-based (Cable, 2010) analysis thereof.

A'INGAE SECOND-POSITION CLITICS ARE MATRIX C-HEADS. In: *Proceedings of the 25th Workshop on Structure and Constituency in the Languages of the Americas*. Vancouver, BC: University of British Columbia Working Papers in Linguistics. To appear. [proceedings](#) [handout](#) [abstract](#)

1.6 *Other*

I conducted other A'ingae-related research, including projects on conditional constructions and nominal classifiers.

CONDITIONAL CONSTRUCTIONS IN A'INGAE. Manuscript. University of California, Berkeley. 2021. [manuscript](#)

COFÁN COMES IN ALL SHAPES AND SIZES. Manuscript. Providence, RI: Brown University. 2017. [manuscript](#)

2 DISCONTINUOUS VOWEL HARMONY IN GUÉBIE

In a collaborative project with Hannah Sande and Emily Clem, we document and analyze discontinuous vowel harmony in Guébie (Kru, iso 639-3: gie) focus fronting. We propose a novel model of the phonology-syntax interface, where subparts of phonologically evaluated phases may undergo further movement.

DISCONTINUOUS VOWEL HARMONY IN GUÉBIE FOCUS FRONTING, as second author, with Hannah Sande and Emily Clem. Manuscript. University of California, Berkeley and University of California, San Diego. In preparation.

PHONOLOGY-SYNTAX INTERLEAVING IN GUÉBIE FOCUS FRONTING, as first author, with Hannah Sande. Paper presented at the 14th Brussels Conference on Generative Linguistics: *Where syntax and phonology meet*, KU Leuven Brussels Campus, Belgium. 2021. [handout](#) [abstract](#)

3 LOGIC IN SPONTANEOUS LANGUAGE COMPREHENSION

In a collaborative project with Roman Feiman, I designed and implemented a novel experimental paradigm for detecting processing difficulty signatures in self-paced reading tasks. We demonstrate that spontaneous natural language comprehension is normatively accurate.

EVIDENCE OF ACCURATE LOGICAL REASONING IN ONLINE SENTENCE COMPREHENSION, as first author, with Roman Feiman. Manuscript. University of California, Berkeley and Providence, RI: Brown University. In preparation. • Paper presented at the 34th CUNY Conference on Human Sentence Processing, University of Pennsylvania, Philadelphia. 2021. [talk](#) [slides](#) [abstract](#) • Poster

presented at the 47th annual meeting of the Society for Philosophy and Psychology. 2021. [talk](#)
[slides](#) [abstract](#)

DO PEOPLE MAKE SPONTANEOUS LOGICAL INFERENCES WHILE READING? Capstone project presented at Brown University, Providence, RI. 2019. [slides](#)

4 PARAGUAYAN GUARANÍ AND FREE AFFIX ORDER

I describe and analyze the prosodic structure of the verb in Paraguayan Guaraní (Tupian, iso 639-3: gug). I show that the Paraguayan Guaraní (partially free) suffix order is determined by phonological subcategorization and prosodic well-formedness. I propose that the phenomenon of free affix order is not unified, but driven by either phonology or morphology, giving rise to two distinct typological profiles.

5 YUCATEC MAYA SYNTAX IN SBCG

In a collaborative project with Justin Bai, Nicholas Tomlin, and Kalinda Pride, we formalize a syntactic fragment of Yucatec Maya (Mayan, iso 639-3: yua) in Sign-Based Construction Grammar. I argue against a nominalization analysis of the language's intransitive subjunctive control.

YUCATECAN CONTROL AND LEXICAL CATEGORIES IN SBCG. In: *Proceedings of the 24th International Conference on Head-Driven Phrase Structure Grammar*. Ed. by Stefan Müller. CSLI Publications, pp. 162–178. 2017. [proceedings](#) [slides](#) [abstract](#)
