A'INGAE METRICAL PHONOLOGY AND ITS INTERFACES

I analyze stress assignment in A'ingae (or Cofán, ɪso 639-3: con), an Amazonian isolate spoken by ca. 1,500 Cofán people in northeast Ecuador and southern Colombia. I argue that A'ingae glottalization is a facultative feature of the metrical foot. I provide a detailed description of the language's rich inflectional paradigm. I demonstrate that the distribution of stress and glottalization depends on complex facts of morphology and syntax.

RATIONALE AND APPREHENSIONAL SEMANTICS:
A'INGAE IN A TYPOLOGICAL PERSPECTIVE

I analyze the semantics of A'ingae rationale clauses and apprehensional adjuncts in collaboration with Scott AnderBois. We describe different uses of the A'ingae apprehensional morpheme -sa'ne 'ᴀᴘᴘʀ' and put forth a formal proposal which elucidates language-internal asymmetries and typological trends within the domains of rationale and precautioning clauses.

A'INGAE LANGUAGE DOCUMENTATION
I carried out language documentation in the A'ingae-speaking communities of Dureno and Sinangoé, Sucumbíos, Ecuador. I deposited over 14 hours of traditional and contemporary oral narratives. I contributed to the development of LingView, a web interface for viewing multimedia language materials.

THE LEFT PERIPHERY OF A'INGAE
I argue that A'ingae second-position clitics are matrix clausal C-heads. Thus, I show that, despite its apparent non-configurationality, A'ingae has structured left periphery.

Complex left periphery in A'ingae. Poster presented at the 25th Workshop on Structure and Constituency in Languages of the Americas, Sogang University, Seoul. In preparation. `poster abstract`

PIED-PIPING BY CYCLIC AGREE
I argue that pied-piping is a consequence of wh-feature percolation, formalized within Béjar and Rezac's (2009) model of Cyclic Agree. I capture cross-linguistic variation with respect to pied-piping and wh-inversion. I account for clausal pied-piping in Basque (iso 639-3: eus).

Pied-piping by Cyclic Agree. In defense of feature percolation. Manuscript. University of California, Berkeley. 2021. `manuscript`

PARAGUAYAN GUARANÍ AND VARIABLE AFFIX ORDER

I describe and analyze the prosodic structure of the verb in Paraguayan Guaraní (or PG, Tupian, ɪso 639-3: `gug`). I show that PG's (partially variable) suffix order is determined by phonological subcategorization and prosodic well-formedness. I propose that the phenomenon of variable affix order is not unified, but driven by either phonology or morphology, giving rise to two distinct typological profiles.

LOGIC IN SPONTANEOUS LANGUAGE COMPREHENSION

In a collaborative project with Roman Feiman, I designed and implemented a novel experimental paradigm for detecting processing difficulty signatures in self-paced reading tasks. We demonstrate that spontaneous natural language comprehension is normatively accurate.

Evidence of accurate logical reasoning in online sentence comprehension, as first author, with Roman Feiman. Poster presented at the 47th annual meeting of the Society for Philosophy and Psychology. In preparation. `poster` `abstract`

YUCATEC MAYA SYNTAX IN SIGN-BASED CONSTRUCTION GRAMMAR

I formalize a syntactic fragment of Yucatec Maya (Mayan, ɪso 639-3: `yua`) in Sign-Based Construction Grammar and argue against a nominalization analysis of the language's intransitive subjunctive control.

Yucatecan control and lexical categories in SBCG. In: *Proceedings of the 24th International Conference on Head-Driven Phrase Structure Grammar*. Ed. by Stefan Müller. CSLI Publications, pp. 162–178. 2017. `proceedings` `grammar_signature` `slides` `abstract`

DEFINITENESS AND WORD ORDER IN POLISH

I argue that the morpheme ten 'ᴅᴇғ' in Polish (Slavic, ɪso 639-3: `pol`) is a determiner whose anaphoric-definite uses are governed by word order and disambiguation. I demonstrate that ten 'ᴅᴇғ' has a typologically novel range of functions.

Definiteness and word order in Polish. Manuscript. Brown University, Providence, RI. 2018. `manuscript`

MISCELLANEOUS

I dabble in things other than linguistics (apparently, philosophy and translation).
